SUMMARY

Enthusiastic Frontend Developer with hands-on experience in building responsive and scalable web applications. Proficient in front-end architecture, RESTful API integration, and enhancing UI/UX to improve user engagement. Adept at writing clean, maintainable code and collaborating effectively with cross-functional teams. Quick to adapt to new technologies and thrive in dynamic environments.

EDUCATION

Full Stack Web Development

Sep 2023 - May 2024

Masai School

Bachelor of Science

Oct 2020 - Aug 2023

Canara College

SKILLS

Programming Skills: JavaScript, TypeScript, HTML5, CSS3/SASS

Frameworks/Libraries: React.js, Redux, Tailwind CSS, Bootstrap, Material-UI, Node.js, Express.js, SQL, JWT, MongoDB, RESTful API, React Testing Library, Jest

Tools and Others: Git, Postman, Swagger, Firebase, Azure Cloud, NPM, Netlify

Soft Skills: Adaptability, Team Collaboration, Problem Solving, Communication

EXPERIENCE

Junior Software Engineer

Jun 2024 - Jul 2025

CoffeeWeb Technology Private Limited

Bengaluru

- Developed responsive web applications using React.js, ensuring user-friendly interfaces aligned with business requirements.
- Designed and implemented reusable UI components within a scalable front-end architecture.
- Optimized application performance through lazy loading, code splitting, and image optimization.
- Participated in technical design and code reviews, ensuring high-quality, maintainable code.
- Integrated RESTful APIs using Node.js and Express.js to enhance front-end and back-end communication.
- Used React Testing Library and Jest for test-driven development (TDD) and continuous improvement of UI.
- Identified, debugged, and resolved UI issues across multiple browsers and devices, ensuring consistent appearance and functionality, improving overall application stability, responsiveness, and user experience.

PROJECTS

Foggy Clothing | React, Redux, JavaScript, HTML5, CSS3

- [Live Demo](#) | [GitHub Repo](#)
- Developed a responsive fashion e-commerce platform using React and Redux, enabling users to browse products, manage carts, filter/sort items, and securely authenticate.

Facebook Clone | React, Redux, JavaScript, Firebase, TypeScript, Chakra UI, HTML, CSS

- [Live Demo](#) | [GitHub Repo](#)
- Built a Facebook-like social platform using React and Firebase, featuring user authentication, posting updates, likes, comments, and real-time data handling.
